

# ENRICHED AIR NITROX COURSE

## Why dive Enriched Air Nitrox (EAN)?

If you like diving as much as we do, then you'll want to spend as much time underwater as possible. Enriched Air Nitrox (EAN) will allow you to enjoy the underwater world almost twice as long, depending on the mix. Another benefit is shorter surface intervals, and reduced nitrogen absorption. For the traveling diver, there are many dive boats that offer nitrox tanks for their customers. This course counts towards your Master Scuba Diver 5 Specialties! You also may be able to earn college credits by taking this course. For details visit <http://www.padi.com/padi/en/footerlinks/collegetcreditsace.aspx>.

## What qualifications do I need to start?

You will need to have your Advanced Open Water certification in order to enroll in the Enriched Air Nitrox Course
